Machine Control Ready Grading Blade
(2D/3D compatible)

1. This laser device allows work in automatic, assisted or manual function. Our integrated technologies allow as much to push huge amounts of material as to make a precise fine grading.
2. Compatible with the SKEER System leveling blade of your choice.

Weight (depending on the leveling blade model)	From +/- 1200 to 1450 lbs
Lateral pivoting angle	60 degrees
Vertical pivoting (5th and 6th position)	24 degrees
Polymer pivots	
Powder coating	
Removable hydraulic cylinder parts	
Hydraulic safety feature	
Easy standard electrical harness	
Proportional valve	
Machine control ready ‘’3D ready’’	
Adjustable quick attach	
This unit includes: • The complete leveling beam • The hydromechanical interface (vertical and angular movements) • The triangular equipment holder (lateral pivoting and traction level adjustment) • All the necessary hydraulic components to add the guidance devices that are not included (laser, RTS, GPS/GNSS)	
***Masts sold separately
